SS-i6

Product name

40-meter underwater photo housing for iPhone 6

Product Brief Introduction

SS-i6 is a 40-meter underwater photo housing for iPhone 6, which allows you to take underwater photos and videos that you have never had with your iPhone before.

SS-i6 is made of top quality plastic which can protect itself against water pressure and impacts while enjoying water sports.

Seashell SS-i6 allows the user to control their smartphone for photo / video operation. The Seashell SS-i6 works well with the standard photo app as well as our proprietary Seashell lite App and Seashell ProApp. This App provides various functions which make underwater photo taking a lot easier.

SS-i6 is preset for a bare iPhone 6. However, it comes along with a set of spare spacers. By changing these spacers, the users can customize SS-i6 to an iPhone with phone jacket in just minutes.

The window of SS-i6 is made of multi-layer A/R coated tempered optical glass for the best quality pictures.

SS-i6 is lovely, user friendly and certainly the best companion for sun and beach vacations and water sports like diving, snorkeling, swimming, wind surfing, skiing, fishing, boating and more…

Product details

Suitable for Apple iPhone 6

Product description

SS-i6 is a 40-meter underwater photo housing for iPhone 6. SS-i6 can turn your iPhone into an underwater camera, which allows you to take underwater photos and videos that you have never had with your iPhone before.

SS-i6 is made of top quality, highly transparent polycarbonate plastic, the same material in producing DVD. It is a kind of really tough material which can protect itself against water pressure and impacts while enjoying water sports.

Seashell SS-i6 incorporates with 4 press buttons on the rear housing which allow the user to control their smartphone for photo / video taking, photo / video mode selecting, and reviewing. Our patented touch screen button control can operate all these functions with good control feeling, no matter it is underwater or above water.

Tripod mount and hot shoe mount are provided, which allow the user to mount accessories, e.g. optional SS-light LED torch light for underwater lighting.

Seashell SS-i6 allows the user to control their iPhone for photo / video operation. The Seashell SS-i6 works well with the standard photo app as well as our proprietary

Seashell lite App and Seashell pro App. These Apps provide various functions which make underwater photography a lot easier.

Features of Seashell Lite are:
1. Disable automatic orientation of phone screen for easier underwater video taking
2. Battery level indication for battery status monitoring
3. Extra-large and off-button control icons for easy viewing
4. Automatically disable the flash light of the phone to prevent reflection
5. Automatic maximum brightness for easy viewing outdoor and underwater
6. Picture review function and self-started video review function
7. Automatic power saving for extended time of underwater usage.

The Seashell Pro app can give additional function in addition to the Seashell lite app with EV +/- control, digital color filter and time lapse functions. Time lapse function allows the user to take self-portrait 10 seconds after activation and continuously take pictures at intervals of 3 seconds. Control of switching between front and rear camera is also possible with Seashell Pro app.

SS-i6 is preset for a bare iPhone 6. However, it comes along with a set of spare spacers. By changing these spacers, the users can customize SS-i6 to an iPhone with phone jacket in just minutes.

The window of SS-i6 is made of multi-layer A/R coated tempered optical glass. It can provide the best quality pictures underwater and above water. SS-i6 also includes an internal lens hood which can minimize light disturbance.

Seashell SS-i6 can also adapt an optional wide angle lens with phone jacket as a separate purchase item. This wide angle lens can provide a much wider view angle and, at the same time, a better depth of field underwater. With this option, Seashell provides the best wide angle solution ever at this moderate cost. SS-i6 owns a patented lock system design. It is reliable and easy to use. SS-i6 is equipped with 4 ear-rings which allow the users to attach neck strap and hand

strap (included) in different ways. A tripod mount is provided, which allows the user to mount accessories, e.g. optional Seashell SS-light II LED torch light for underwater lighting or Seashell selfie stick.

A comprehensive user manual in every SS-i6 set and on-line manuals in various languages are provided to give detailed explanation on the setup of SS-i6, operation, test procedures, and maintenance methods. Optional spare O-ring and O-ring grease are available as optional purchase items.

SS-i6 is lovely, user friendly and certainly the best companion for sun and beach vacations and water sports like diving, snorkeling, swimming, wind surfing, skiing, fishing, boating and more…

Seashell SS-i6 comes with one year limited warranty.

Features summary

Compatible with Apple iPhone 6
Work with standard camera app and proprietary Seashell lite app
Easy configuration for different phone model within minutes
Can fit with and without phone jack
Can adapt 0.68X internal wide angle lens (optional)

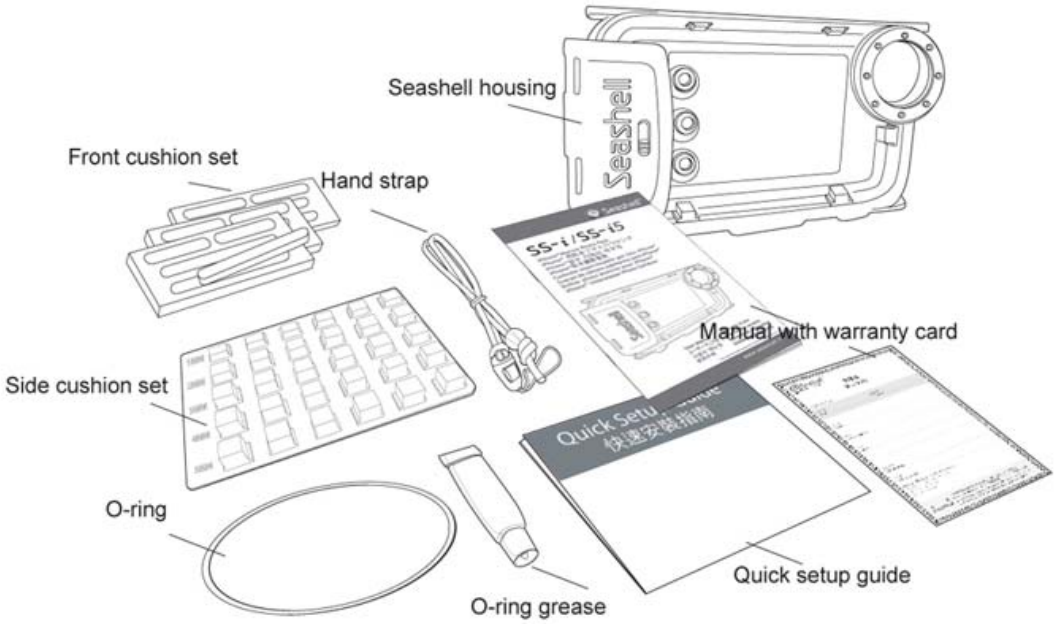
What's included?



Getting started

SS-i6 is preset for bare iPhone 6 without phone jacket. Customization can be made on SS-i6 to fit the iPhone with phone jacket. To do so, replace the pre-configured side spacers at the front housing with thinner side spacers depending on the thickness of the phone jacket. Replace the pre-configured 2mm front cushions with 1mm cushions supplied with the package.
