

# Hugyfot housing for **GoPro 3/3+**

Base housing

Pro housing

Without a doubt, the GoPro 3/3+ is an exceptional camera. Therefore Hugyfot developed an exceptional housing for this camera, which offers:

- up to 6 hours of runtime instead of 40 minutes (with optional extra battery and with the original GoPro LCD screen activated);
- possibility of fitting the original GoPro LCD screen in a separate watertight housing (with a 3 meter cable) to be used as a pole cam;
- possibility of fitting an underwater microphone;
- possibility of adding an extra external battery pack for extreme time lapse shots;
- possibility of adding an extra video outlet with 100m cable for surface monitoring;
- pressure rated to 200m.

Flip-up macro lens holder M67/M77 (optional).

Electronic interface with video-outlet and power-inlet.

Since 1953

# Hugyfot GoPro Pro housing with surface video outlet

The Hugyfot GoPro Pro housing can be equipped (optionally) with an extra video outlet to support surface monitoring. This surface video cable can be up to 100m long. This option cannot be installed by the end user and has to be ordered together with the

Pro housing. It can however be installed afterwards in our factory. Both GoPro Pro housing and surface cable are equipped with an S-6 connector. The surface end of the cable comes with a BNC connector and an RCA adapter.

## Hugyfot GoPro Pro housing surface cable connection

Item	Item N°
S-6 connector (female) installed in Pro housing	6.419
S-6 connector (male) fitted to coax cable	8.380
BNC/RCA connector fitted to coax cable	8.384
Coax cable (price/meter)	8.379
