

power cable can be added in option

- 9.372 Hugyfot Vision SDI Housing
- 9.373 Surface Monitor SDI Cable 100 mtr.
- 9.375 Spare Battery set for Hugyfot Vision SDI Housing

The **Vision Hero SDI** is the most advanced GoPro housing ever. In order to get the best out of your GoPro Hero 5, 6 or 7, Hugyfot engineers developed this rugged, yet extremely versatile housing for broadcast and professional use. Installing the Hero 5, 6 or 7 only takes seconds thanks to the plug and play wiring system and the rotary eccentric quick closing mechanism. The housing is powered by 3 lithium power banks that guarantee a 5 hour camera and monitor operation. The large 7" 3G-SDI 4K HDMI IPS Full HD 1920x1200 monitor displays every detail and is extremely helpful when shooting macro images. The Vision Hero housing comes standard with a flip-up red filter and screen protection, the Hugyfot multi functional wing and rigid aluminium handles with 1" mount balls. Machined out of solid aluminium, it is pressure rated to 200m and offers full camera control.

The **build in FEELWORLD F7S monitor** supports ITU standards and HD video Rec.709 standard consistent color space. It has advanced image processing technology so that the image is presented in an extremely natural color to enable users to accurately evaluate the quality of the shot.

On top of the housings are 8 buttons that allow you to immediately improve the shooting efficiency. F1 and F2 custom shortcut function keys offer fast access to the functions you need, focus assist, peaking, zoom, false color, exposure, etc.
