

# GOPRO COMPACT BASE

JAN:4570018120749

## Simple lighting solution for GoPro users

### Compact hand-held GoPro with video light

Conventional grip allows to attach a GoPro camera OR video light making clips colorless. The GoPro Compact Base allows to attach a GoPro camera AND a video light on a handgrip at the same time. In combination with the optional "Z Joint" and "Direct Base YS RT", the system can be further expanded. Furthermore, a lens holder can also be attached to use different lenses in a single dive.

#### ◀①Hand Grip

Easy-to-grip hand grip with YS mount. The YS mount is removable to use with other adapters.

#### ②Z Joint

#### ③Direct Base YS RT

#### ④AD Lens Holder for Float Arm

#### ◀⑤SD Front Mask for HERO9

Enabling to install wet lens for GoPro HERO9/10/11 genuine housings as well as attaching various joint adapters to the bottom.

Can be attached to carbon telescopic arms as well.

#### ◀⑥UFL-G140 SD Underwater Semi-fisheye Lens (left)

The UFL-G140SD increases GoPro's narrow underwater angle of view to an ultra-wide 140° semi-fisheye angle. The depth of field is also prolonged to "4cm to infinity" to enable dynamic close-up photography.

#### ◀UCL-G165 SD Underwater Wide Close-up Lens

Greatly shortens the minimum focusing distance of the GoPro underwater. The lens enables to focus from a few centimeters in front of the lens, allowing you to get closer to your subject to fill your subject larger in a frame.

#### ◀⑧LF2400h-EW

Powerful underwater light for wide-angle imaging, powered by 6 AA batteries, with a maximum 2400 lumen, 12-step intensity adjustment and a 100-degree beam angle underwater. Using packaged rotatable light shade can help to reduce flare and ghosting. White LEDs of about 6500K with extended color reproducibility produce optimum light quality as a light source for photography.

#### ⑦Quick Holder Set S-LF▶

A light holder with one-touch operation for easily detaching and reattaching
