Attachment lens compatible

For easy and handy strobe shooting D-2000 Starter Kit

The INON S-TTL auto 「D-2000」strobe provides highly accurate TTL auto strobe shooting not only for point & shoot digital camera shooters but also for digital SLR users. The new INON Shoe Base Set benefits you to install the D-2000 strobe directly on compact digital camera housing to enjoy strobe shooting with handy system. The INON Shoe Base Set holds the D-2000 simply on the hot shoe of various camera manufacturer's housing enabling you to bring camera system for diving to capture underwater world with powerful external strobe. The starter kit is best suit for people who have hesitated to add an external strobe to avoid fighting with big rig. Let's start get in advanced shooting with this compact set!

High performance multifunctional D-2000

D-2000 provides comfortable fundamental features including Guide Number 20, circular 100 degree beam angle and minimum 1.8 sec. recycle time at full flash and 3W next generation LED Focus Light.

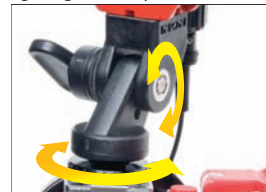

Reliable S-TTL auto exposure

INON Cap-Holder Unit is exclusively designed for each different housing to locate Optical D Cable at ideal position to provide reliable S-TTL auto exposure without any modification like using trimmed versatile shade sheet.

Free angle and creative lighting

The Shoe Base Set supports strobe's flexible aiming not only by vertical movement but also by horizontal movement to adapt to various shooting conditions and to enhance lighting creativity.

「D-2000 Starter Kit」 contents ※1

- D-2000 Strobe

Easy!

Underwater Shooting Tips on official INON blog

INON explains adequate camera / INON strobe setting to shoot underwater for various camera manufactures' model including Olympus, Fujifilm, Panasonic, Canon

<http://www.inon.co.jp>

※under construction as of August 2008

Unlimited subject width with attachment lens

INON D-2000 Starter Kit is not only to support readily use of an external strobe. You can use various underwater exchangeable INON attachment lenses depending on subject like fish-eye conversion lens to shoot whales or close-up lens for sea slugs.

Extensibility for multiple strobe system

Only optional INON Arm-II system expands the starter kit to dual or triple strobe system for sophisticated lighting. The INON D-2000 Starter Kit is real starter kit to build up the system to suit to your own shooting style without changing base stay.

D-2000 Strobe Reliable S-TTL Starter Kit

Compact kit including D-2000 for direct installation on the hot shoe of a housing to shoot advanced image which is hard to get with built-in flash only. Upgradable for attachment lens use with optional mount base etc.
