

A new year has started and 2014 will be for SUBAL an important year, with many challenges ahead of us. The photo industry is moving at a faster speed every year and we require to work harder in different areas and adapt to new changes and market requirements.

One of our biggest goals is to bring our products faster on the market. We are working now on new designs, faster development and releases of more different high end housing models for DSLR, Compact and Mirror less cameras. We extended our development department to improve in this field.

Important events and Shows in this month.

- Boot Show Germany 2014, one of the world largest consumer show for the maritime industry, watersports, underwater industry and leisure, takes place from the 18 -26th of January in Düsseldorf.
- Subal will be presented in this important event, booth D27 Halle 3.
Please come and see our new products!

The new SUBAL ND4S housing and the new SUBAL FS-700 video housing and the Blackmagic Pocket cinema housing are available in SUBAL colour and in black and also in a 150m TEC version.

All these housings represent a concentration of SUBAL advanced housing development technologies and long experience for over 60 years. These models offer a high level of completion as a next-generation housing design and expands the possibilities for professional and amateurs photographers who always require the best possible performance and handling in extreme environments. Subal will continue to develop high-performance, highly functional housings based on the know how it has cultivated over its long history.

The new ND4S housing fits to the first D4 and for the new D4S Camera
