

MINIFLEX-N 8BF/DL

for NIKON F801/N 8008

Adjustable Viewfinder optics:

Specifically designed for the High-Eyepoint viewfinder, the DeLuxe viewfinder gives full and comfortable viewing of the whole frame including the information panel with a minimum reduction of the viewfinder image. It also incorporates a +/- 3 dioptre adjustment for spectacle wearers. The viewfinder housing creates more space for your regulator and makes handling more comfortable.

Controls:

Camera Power, Shutter release, Zooming, Aperture, Control Dial, Focus (manual), Focus Mode Select, Meter Mode Select, Exposure Compensation, AF Lock, Viewfinder Illumination.

Technical data:

Marine grade aluminum alloy, fully hard anodized. All parts are made of anodized light metal, acid proof steel or high quality synthetics. Seamless precision O-Rings. Spring loaded pin wrench screws.

The **SUBAL MINIFLEX-N8** is the smallest and lightest underwater housing yet it offers the most comprehensive features. Only slightly larger than your Nikon F801 (N8008) camera, the housing fits into your hand like a glove. Shutter release and all important controls are located ergonomically so you can operate the camera as you would on land. All of the camera's important functions can be operated underwater opening up the full capability of these sophisticated cameras to the underwater photographer. Changing film is done without removing the camera and removing the camera body to change lenses only takes a few seconds. The accurate positioning of the camera eliminates the possibility of mistakes. The housing is closed with two safe and retained pin wrench screws.

W x H x D:

Approx. 230 x 170 x 120 mm (w/o Port and accessories)

Weight:

Approx. 1,7 kg. (w/o Port and accessories)
